

CELLER CREDO

XAREL-LO | BIODIVERSITAT | **PATCHWORK**

PATCHWORK is a clear statement of intent on our goal of building a circular economy.

Historically, the pursuit of excellence has led us to be highly demanding in selecting grapes and the most delicate press fractions. Celler Credo's Patchwork line aims to showcase high-quality "patchwork" wines from our vineyards or wines that do not form part of the core Celler Credo line.

And the Winner is... 2020

*Winning doesn't always mean being first.
Winning means you try to do better
than you've ever done before.*

And the Winner is... is made from a mosaic of organic vineyards that represent the diversity and singularity of soils, exposures and altitudes in the Penedès region.

We care for the vines and the natural environment by using organic, dry-farmed viticulture practices, and we're committed to diversity in varieties that have historically defined the essence of Penedès, specially Xarel-lo variety.

Celler Credo has formed partnerships with top-tier growers in the Penedès region with whom we share values and a commitment to sustainable viticulture, rooted in respect for identity, the territory and the landscape.

All Celler Credo grapes are harvested by hand to ensure a precise selection of the fruit and to guarantee its excellent quality. Furthermore, we take great care over grape ripening with the aim of producing wines with natural, fresh acidity.

We give priority to low-yield vineyards and dry-farmed crops, an approach that gives our wines their characteristic Mediterranean identity while also ensuring responsible management of scarce water resources.

The must fermentation takes place in stainless steel tanks on indigenous yeasts isolated from Celler Credo's vineyards, an essential element for producing truly terroir wines.

And the Winner is... may contain natural sediments due to our minimal intervention.

**Vinified and bottled
on the family-owned estate**

Varieties

Xarel-lo, Macabeu and
Parellada

Alcohol content

11 % · 750 ml

Total Sulphur dioxide

47 mg/l

150 mg/l is the max. permitted by
the EU for organic white wines
